

HYDROMASSAGE©

HydroMassage treatments allow you to enjoy the benefit of water massage while remaining dry and fully clothed. Programmed water jets target the areas you specify to improve blood flow, help relieve tension, and decrease musculoskeletal pain. HydroMassage is particularly helpful to those with high levels of stress and can improve headaches, neck and back pain, and muscle pain. HydroMassage is scheduled separately from office visits. Sessions may be purchased individually or in discounted multi-session packages.
